

QCPOA Policy #2007-1

DRIVEWAY CONSTRUCTION: Beginning July 3, 2007, all driveways constructed in Quartz Creek Properties must have a minimum of a 12 inch diameter culvert installed where the drive crosses the ditch at the edge of the road. In those unusual circumstances where the property owner feels that a culvert may not be needed due to the lack of slope or other conditions, the property owner may petition the Board in writing to request an exemption. The Board will make a site visit to determine if an exemption shall be granted.

Please note that a driveway waiver from Gunnison County **does not** exempt any owner from this requirement.
